PROFILE

4+ years of professional experience as a Front-End Developer, providing my skills to a company that helps a wide variety of clients across all industries, from local start-ups to Fortune 500 companies. Comfortable working as part of a team and passionate about using my creative background to develop attractive and dynamic web applications.

EXPERIENCE

Americaneagle.com   *July 2019-present*
Front End Developer

Responsible for implementing visual and interactive elements through a variety of web applications and content management systems, while coordinating efforts with team members to build new sites and update existing projects.

- Develop and maintain web projects for both B2B and B2C companies
- Implement responsive, accessible, and cross-browser compatible front-end designs
- Perform page speed audits and process metrics in order to improve web page performance
- Practice agile development methodology
- Assist in the execution of digital marketing campaigns (SEO, email/newsletter templates)

Examples of completed projects:

renown.org (Sitecore)
spray.com (Sitecore)
weathertech.com (idev)
chicagowolves.com (WordPress)
lgamerica.com (2022 Sitefinity Website of the Year)
